SERVICE

Training center Pressure equipment directive

• PRESSURE EQUIPMENT DIRECTIVE

Implementing of the rules relating to study, realization and exploitation of refrigerating and air conditioning installations

Our role as professionals is to help our customer:

- To take inventory of his pressure equipment and to control its condition
- To upgrade to compliance with the directive
- To develop a schedule of periodic inspections and their administrative monitoring

Two-days training

Subjects developed

- > Process
- > New Professional Technical Specification
- > Responsibilities and obligations according to the category (hypermarkets and supermarkets / Industry)

One day dedicated to practical cases study

- > Equipment classification
- > Equipment categories
- > Equipment analysis on site

Training objectives

- Be able to apply the Pressure Equipment Directive to the refrigerating and air conditioning installations
- Master the main elements of the rules relating to study, realization and exploitation of refrigerating and air conditioning installations
- Implement these elements for the realization of the studies, installation files and during the follow-up led by the technicians on worksite
