

PHARMACY

Solutions mastering the requirements in controlled atmosphere.

Paumier Industrie designs and carries out HVAC solutions for:

- ✓ Production units,
- ✓ Clean and ultra-clean rooms,
- ✓ Weighing and dosing systems.

The provided services meet the current requirements for safety and traceability.

Design of refrigerating groups adapted to your process:

- ✓ Design and manufacturing of refrigerating units for cold production and distribution with refrigerants (direct expansion up to -60°C, ammonia installations) and/or with coolants at all temperatures (MEG, MPG, Temper, calcium chloride...).
- ✓ Freezing tunnel at all temperatures.
- ✓ Installation of cooling towers and water treatment systems in order to control any risk of Legionella proliferation.

Control and Management of all types of atmospheres (neutral, explosive, corrosive, dusty...):

- ✓ Opacimetric and gravimetric filtration, filtering ceilings.
- ✓ Purification through air washer.
- ✓ Pressurization: overpressure or relief setting of treated rooms.

- ✓ Air distribution by means of textile or rigid duct.
- ✓ Dehumidifier by thermodynamic or chemical system.
- ✓ Humidification by steam injection or misting.
- ✓ Temperature maintenance in the storage areas.
- ✓ Computerized follow-up of thermal and humidity data.
- ✓ Equipment of cold rooms at positive or negative temperature.
- ✓ Installation compliance according to the evolution of European standards (replacement of halogenated refrigerants,...).
- ✓ Maintenance of your installations, standby duty service according to your needs.
