

TECHNICAL ASSISTANCE

Upon your enquiry, the After-Sales Services Manager will establish a pre-diagnosis to adapt the intervention (recording, management and traceability of all requests).

Maintenance adapted to your needs

According to your needs, our experts carry preventive and/or corrective maintenance in France and abroad:

- ✓ Technical audit of your refrigerating and air conditioning installations
- ✓ Technical and troubleshooting assistance

[Configure cookies](#)

Our main goals:

- ✓ Ensuring performance of your installation during its operation ;
- ✓ Maintaining in operational condition ;
- ✓ Limiting incidents and failures ;
- ✓ Reducing production losses and damages ;
- ✓ Allowing you to contain your production costs ;

Our refrigeration technicians and commissioners are entitled to intervene. They can work in industrial and sensitive sites (petrochemical, offshore, chemical, pharmaceutical, agri-food, logistical and marine sectors...).
